

Name: \_\_\_\_\_

# Nesting Site Worksheet

EIA also known as \_\_\_\_\_ tells us the environmental consequences of a project. It highlights both the negative and positive impacts.

The construction was damaging the turtles' \_\_\_\_\_. The turtles had to leave as all the rubbish was \_\_\_\_\_ the area.

Without the turtles, the \_\_\_\_\_ sponge population overgrew. This caused the \_\_\_\_\_ to suffocate.

Doing an EIA can help reduce the \_\_\_\_\_ problems. In this case, a turtle \_\_\_\_\_ facility was built as an \_\_\_\_\_ nesting area for the turtles.
